

Customer Insights & Recommendation Project Report

Prepared By: Mohd Danish

Tools Used: Microsoft Power BI, Microsoft Excel

1. Project Objective

The objective of this project is to analyze customer and sales data to identify customer behavior, sales trends, product performance, and business opportunities. The dashboard enables management to make data-driven decisions using interactive visualizations and actionable recommendations.

2. Dataset Overview

- Customer ID
- Customer Name
- Order ID
- Order Date
- Product Name
- Category & Sub-Category
- Region & State
- Sales
- Profit
- Quantity
- Payment Mode
- Ship Mode

3. Dashboard Overview

- Total Sales
- Total Profit
- Total Quantity
- Total Customers
- Sales by Category
- Sales by Segment
- Sales by Payment Mode
- Sales by Ship Mode
- Customer Value Segmentation (High, Medium & Low Value Customers)
- New vs Returning Customers
- Monthly Sales Trend
- Monthly Profit Trend
- Top Customers by Sales
- Product Performance
- Region Filter

4. Key Insights

1. Consumer Segment contributes the highest sales.
2. Most customers belong to the Low Value customer segment.
3. Returning customers account for the majority of customers.
4. COD is the most preferred payment mode.
5. Standard Class is the most frequently used shipping mode.
6. Phones are the best-selling sub-category.
7. Sales and profit generally increase toward the end of the year.

8. A small group of customers contributes a significant portion of total sales.

5. Customer Segmentation

Customers were divided into three groups based on their total sales:

- High Value Customers
- Medium Value Customers
- Low Value Customers

This segmentation helps identify loyal customers and target marketing efforts more effectively.

6. Business Recommendations

1. Introduce loyalty and reward programs for High Value customers.
2. Convert Medium Value customers into High Value through personalized offers.
3. Increase engagement with Low Value customers using targeted promotions.
4. Promote online payment methods through discounts and cashback.
5. Improve marketing for low-performing product categories.
6. Focus on retaining returning customers with exclusive benefits.
7. Increase inventory for high-demand products.
8. Monitor monthly sales trends to improve future planning.
